■ Currently Working in US Based Company as AI / LLM / SLM Engineer

PROFESSIONAL SUMMARY

I am an **AI Engineer** specialising in Generative AI, Conversational AI, AI Agents, and Intelligent Automation. I design and develop AI-powered solutions that help businesses automate workflows, improve customer interactions, and streamline operations. Currently working as an **AI/LLM/SLM Engineer at NeuralHub** (US-based, Healthcare Industry), contributing to AI-driven applications, intelligent agents, and automation systems. My focus is on building production-ready solutions using **LLMs, SLMs, RAG, vector databases, and modern backend technologies**.

GenAI Developer	AI Agent Architect	LLM/SLM Engineer	Automation Specialist
Backend Developer	Conversational AI	Chatbot Developer	AI Workflow Designer

TECHNICAL SKILLS

AI & Machine Learning

Generative AI (GenAI)	LLMs	SLMs	AI Agents
Agentic AI Systems	Prompt Engineering	RAG	Vector Search
Conversational AI	Chatbot Dev	ML Fundamentals	AI System Design

Programming & Backend

Python	FastAPI	REST APIs	Backend Dev
API Integration	Microservices	Git & GitHub	Authentication

Databases & Storage

Qdrant Vector DB	PostgreSQL	MongoDB	Firebase
Supabase			

AI Platforms & Tools

OpenAI	Claude	Dialogflow	Kommunicate
OpenSDK	Claude Code	n8n	Make.com
Flowise	LangChain	AI Agent Frameworks	

PROFESSIONAL EXPERIENCE

AI / LLM / SLM Engineer

Jun 2026 – Present

NeuralHub — US-Based Company (Healthcare Industry)

- Developing AI-powered healthcare solutions using LLMs and SLMs
- Building intelligent AI agents and automation systems for clinical workflows
- Designing conversational AI interfaces and RAG-based retrieval pipelines
- Implementing vector database integrations with Qdrant and PostgreSQL backends
- Architecting scalable AI systems for patient intake and healthcare data management

Generative AI & Chatbot Developer

Jul 2025 – Present

Saylani Mass IT Training Program (SMIT) — Karachi

- Chatbot development using Dialogflow and GPT-based assistants
- RAG (Retrieval-Augmented Generation) system design and implementation
- FAQ and customer-support chatbot development and website integration
- Working with structured data (CSV, knowledge bases) for AI pipelines

Dec 2025 – Feb 2026

Internee.pk — Karachi

- Worked on frontend development tasks using modern web technologies
- Improved understanding of project-based development and delivery

KEY PROJECTS

AI Patient Intake & Receptionist Agent (Healthcare)

- Intelligent system that collects patient info and generates structured summaries
- Handles family health discussions and emergency-related information triage
- Automates patient onboarding workflows end-to-end

Customer Support AI Agent

- AI-powered support bot handling user queries with automated resolution workflows
- Integrates with live data sources to improve response accuracy and speed

Intelligent Data Collection & Workflow Automation Systems

- Automated data-gathering and processing pipelines with structured output management
- AI automation reducing manual work and streamlining business operations

CORE COMPETENCIES

AI Agent Development	LLM Application Dev	RAG Systems	Healthcare AI Solutions
Conversational AI	Chatbot Development	Backend Engineering	API Design
Database Design	Workflow Automation	AI Architecture	AI System Design

CAREER OBJECTIVE

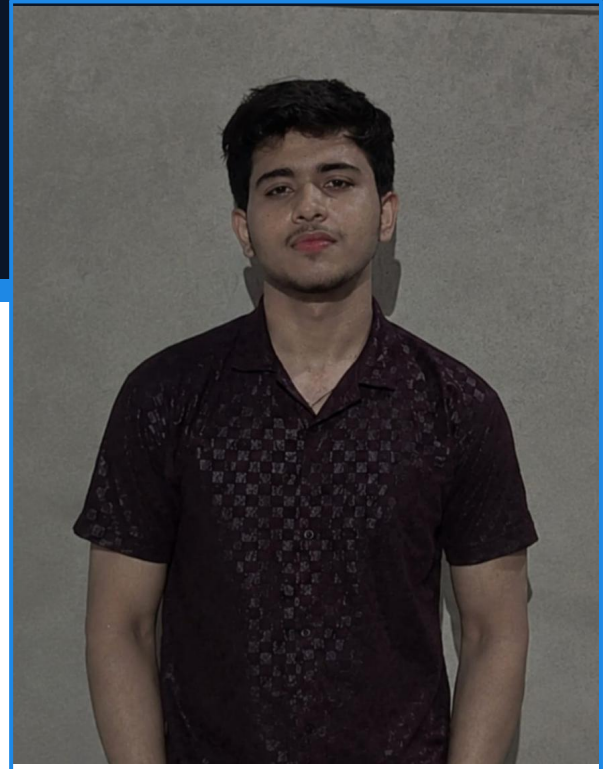

My goal is to become a world-class AI Engineer and AI Architect, building scalable AI systems that solve real-world business challenges. I am passionate about advancing expertise in Generative AI, Machine Learning, Agentic AI, and enterprise-grade AI solutions — contributing to innovative products that create meaningful impact for businesses and end users alike.

"Building AI Agents, LLM Applications, and Intelligent Automation Solutions for the Future. ■"
